Dear Kate

Thank you for the email in which you included me. It gave the impression that Nnamdi is residing in the country illegally, and for that reason, you wish to stop any progress in his life activities, including rehousing.

I would like to inform you that Nnamdi is legally residing in the United Kingdom, and his status will remain unchanged until a new visa is issued.

If he continues to receive his benefits and resides in your supported accommodation funded by public money, I cannot discern a reason for his rehousing to be suspended unless there is an intention to obstruct him once more, as was done previously.

I will clarify that the reason he did not relocate previously was due to the new home being informed of all the negatives about Nnamdi, including his non-compliance with medication. This influenced their decision to not accept him, and you ensured there was a valid reason for not involving me in the assessment until later. Even though it was known from the start that Nnamdi wanted his mother to be involved in his care.

On this occasion Nnamdi is very compliant with his medication without much input from staff. He was constantly being told that he would move after his GCSE and he was looking forward to that. His GCSE is finished. Nnamdi should not be denied the chance to move out due to workplace politics being used to retain him in that home for additional financial gains.

Nnamdi, is a vibrant 23-year-old, seeking independence to reach his full potential, as he expressed in his letter to the professionals overseeing his care.

I believe that Nnamdi should be supported in becoming independent. On multiple occasions, Nnamdi has indicated his desire for more freedom than what is offered by 24-hour supported living, which would also be more cost-effective for the council. He is prepared to transition away from round-the-clock accommodations and requires support to achieve this.

As I mentioned previously, when Nnamdi first emailed the CQC expressing his dissatisfaction with certain aspects of the home activities. I mentioned over the phone that he needs to move out of your accommodation and is seeking much more independence.

Believe it or not, I am Nnamdi's mother and I understand him better than any healthcare professional who comes and goes.

When Nnamdi expresses his outcry by sending spontaneous emails to authorities, professionals may not appreciate it, but it seems his voice is currently going unheard. I receive his spontaneous emails at the same time as you do, even when I'm at work.

Nnamdi is very young and has capacity. I suggest that a 12 hours accommodation be provided for him in my own opinion. I am not expecting AK supported to find accommodation for Nnamdi as they have not been helpful in the past and they are not being helpful at present.

If the social worker and the mental health team could please look into this as they usually do. They are aware of the best accommodation suitable for Nnamdi, I would be grateful. I mentioned this because whenever a meeting is scheduled, a member from the social service and mental health team is always in attendance.

This young man is waiting patiently, as he was assured he would be moved after his exam. This was communicated to him in several meetings before his GCSE exams. There must be someone to assist him with the move. Even if no one is allocated from social services, the work should still proceed. I don't want him to fall into crisis before he is relocated.

I have composed this email based on my personal experiences with the events concerning Nnamdi, and it is not my intention to offend anyone.

As a nurse, I provide care for other people's children and families, and I expect my own family to receive adequate support rather than becoming entangled in workplace politics. Consider how you would feel if it were your child, knowing that you have assisted many families in the healthcare profession.

I am looking forward to Nnamdi having a successful transition to a place closer to home. Myself and his siblings are happy to continue offering our support as usual.

Thank you

Esther .
Nnamdi's mum

Dear Keith,

Good afternoon. Please see below an email sent to me by Nnamdi Okpala.

I have spoken to him regarding moving into his own apartment. I have sat with him explaining that he needs to keep abiding by the house rules and taking his medication which is doing very well and if this continues then we are sure of progression.

However, Nnamdi has been made aware he cannot start bidding for Housing through Thurrock Council due to his stay in the UK. Already his mother has put in application for his Indefinite leave to remain. So when this is out, then he can be registered fully to start bidding. All this is a process and Nnamdi had been made aware in the past. But I reminded him about it and reassured him this will definitely happen in good time.

Thank you.

Kind Regards.

Kate Ekwo
